

# LY DOLLAR CHUON | SOFTWARE DEVELOPER

**Stack:** Next.js, TypeScript, Tailwind CSS, ShadCN/Radix UI, Firebase

**Timezone:** UTC+7

## TECHNICAL SKILLS

- **Frontend:** Next.js, React, TypeScript, Tailwind CSS.
- **Backend:** Firebase (Auth, Firestore, Storage), Git/GitHub.
- **UI/UX Logic:** Shadcn/UI, Responsive Design, Radix UI.

## CORE PROJECTS

### WAPIWAPI (Full-Stack SaaS Graduation Project)

- Created a scalable **Software-as-a-Service (SaaS)** platform for independent learners, using Next.js and Firebase.
- Implemented authentication and real-time database queries for a seamless experience.
- High performance and minimal UI by reusing ShadCN and Radix UI components.

### madebydollar.studio (Media Hub & Portfolio)

- Developed a cinematic and intense web platform, focusing more towards Next.js and the UI design.
- Integrated a hybrid of portfolio, article/blog, pinterest, CV, landing page, and an all-in-one Link in Bio tool.
- Designed a system with consistent color palettes, for a cohesive look.

## EXPERIENCE

### Lead Developer | WAAI (~Independent Agency)

- **Experience:** Carefully built and maintained a creative agency and multiple digital products.
- **Achievements:** Developed a complete CRUD inventory system for a car dealership client, handling database, ui, and logic.
- **History:** Background in game and environmental design, having developed over 100+ experimental games in Roblox Studio prior to 2023.
